

XUVER CONVERTER

OPEN THE XUVER CONVERTER

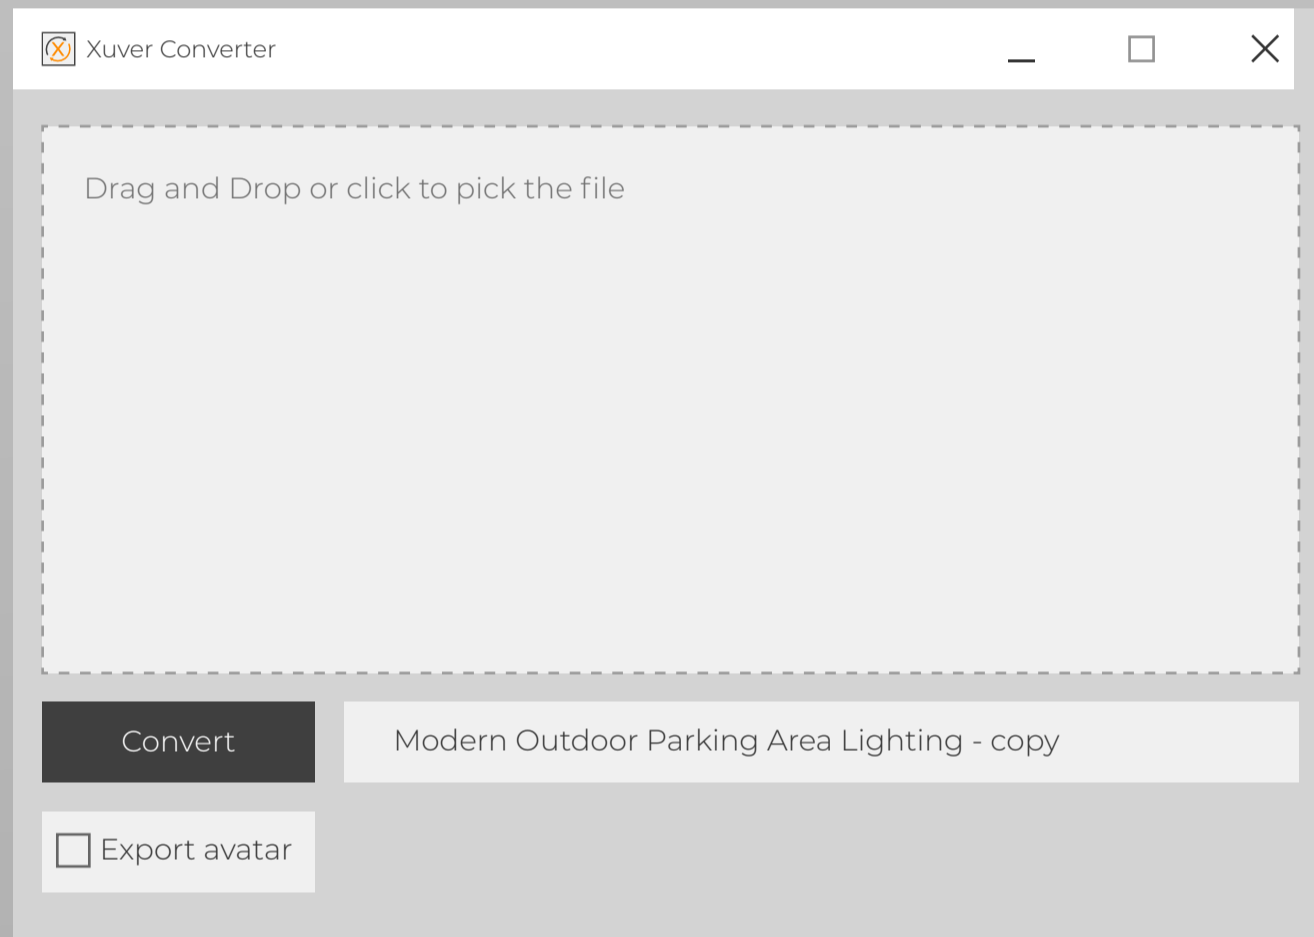

Go to **Start - Xuver - XuverConverter**.

ADD FILE TO CONVERTER

There are 2 ways to add a file to the Xuver Converter:

1. Drag the file from the directory into the converter window
2. Click on the Rectangle in the centre of the converter window. This will open your fileshare, select your file.

ACCEPTED FILE FORMATS

- .skp (SketchUp 2016)
- .ifc (IFC2x3 or IFC4)

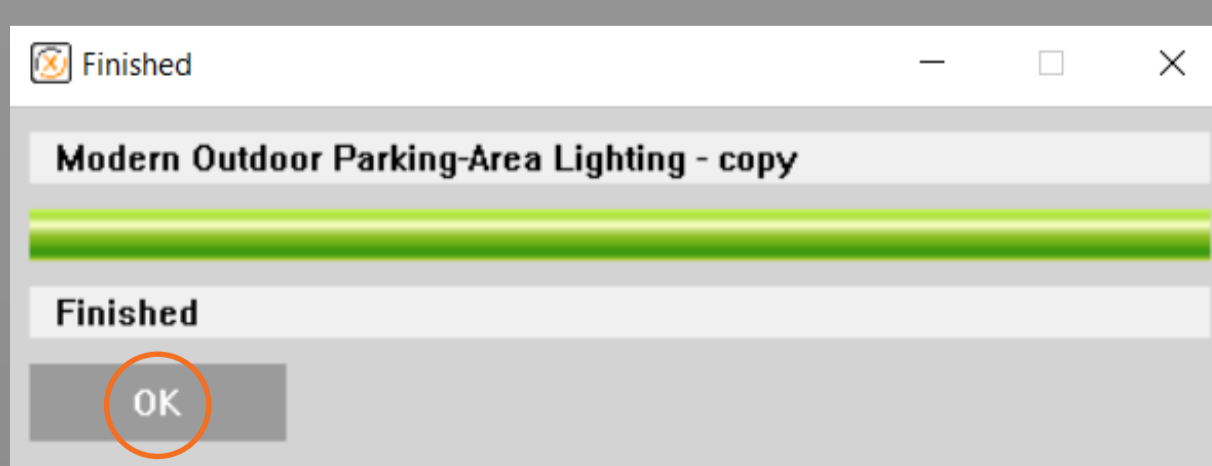

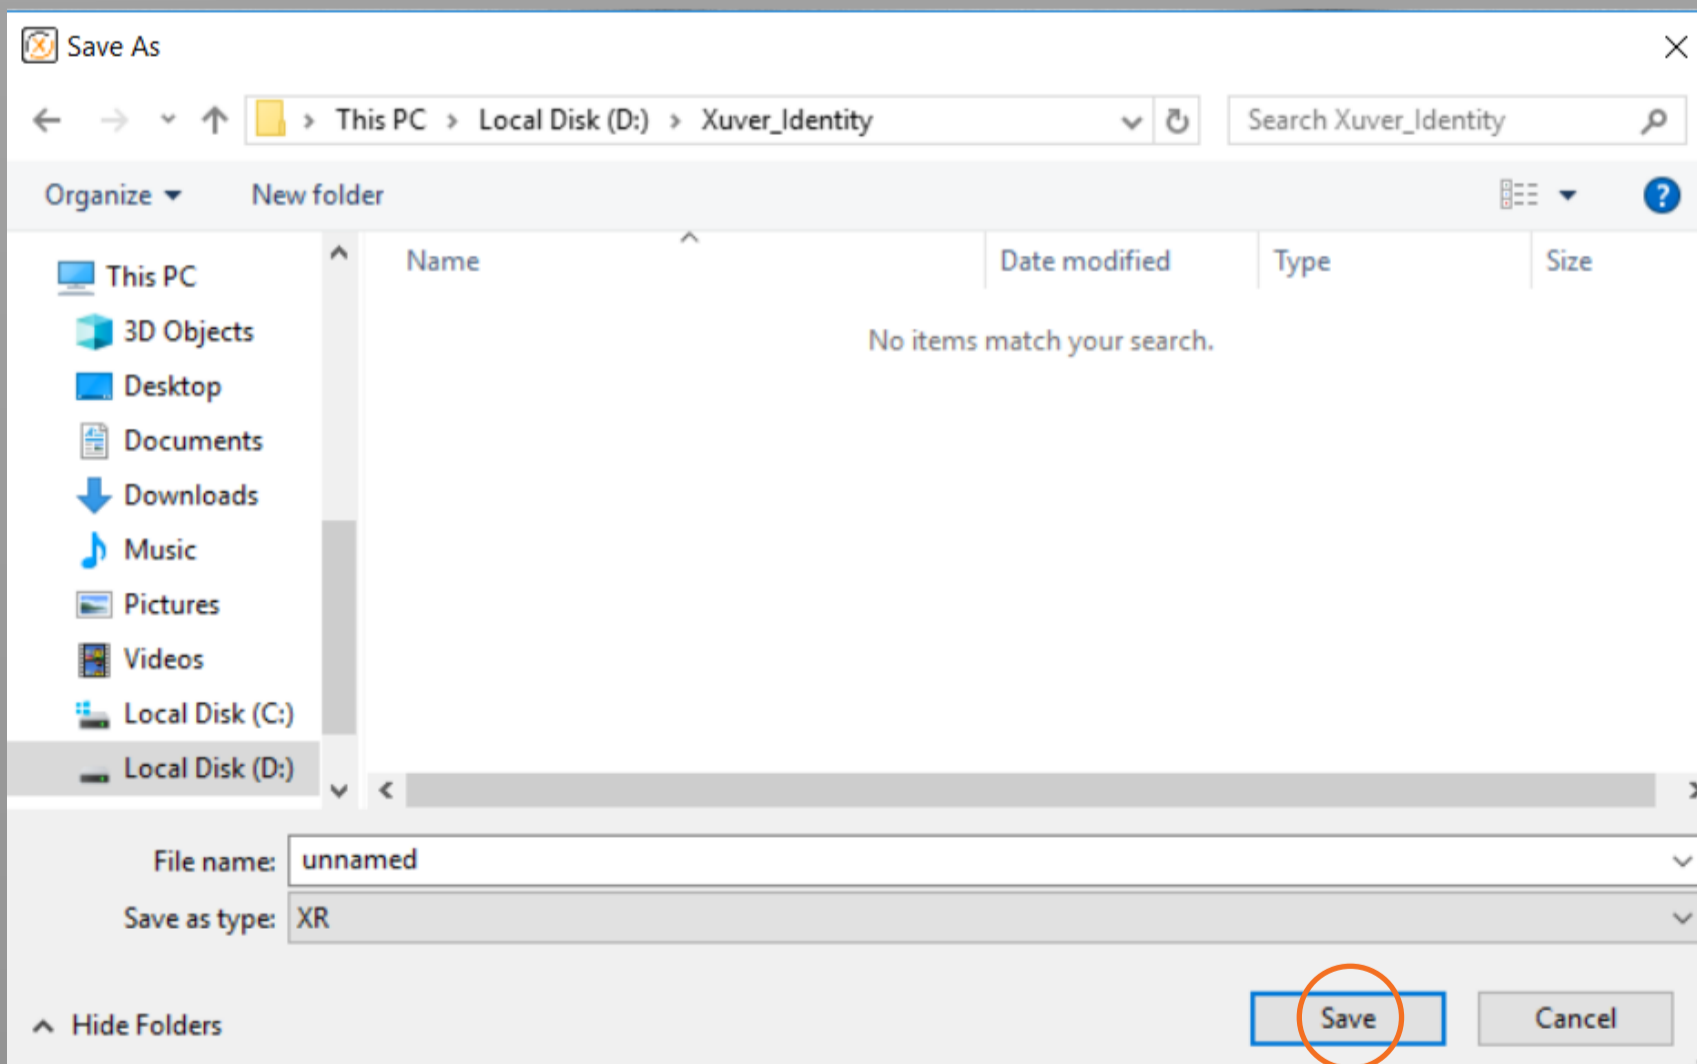

START CONVERT

1. Select **Convert** Button. A save window will appear
2. Select a save location in your directory and press **Save**

After pressing save a pop-up window will show the process of converting. Select **OK** when finished. This will take you back to the converter window, you can repeat the process for converting other files or close the window when you are finished.

UPLOAD

To visualize your model in the Viewer, Login to your Xuver Account and upload your .xr file on the platform.
